

IEA Bioenergy

WEBINAR SERIES

IEA Bioenergy, Global Collaboration on Sustainable Bioenergy, A Look Forward

Wednesday 20 May 2020

04:00 pm - 05:00 pm Central European Summer Time
10:00 am - 11:00 am North American Eastern Daylight Time
03:00 pm - 04:00 pm British Summer Time

Presenter

Jim Spaeth

U.S. Department of Energy
Chair IEA Bioenergy

Presentation Summary

The IEA Bioenergy Technology Collaboration Programme (TCP) comprises a world-wide network of experts in every aspect of the value chain of biomass for energy. Our mission is to increase knowledge and understanding of bioenergy systems in order to facilitate the market deployment of environmentally sound, socially acceptable, and cost-competitive, low carbon bioenergy systems and technologies, and to advise policy and industrial decision makers accordingly. Our work is carried out through 'Tasks' and special projects, covering the full value chain from biomass feedstocks to final energy product. Currently 25 countries and the European Commission are members of the TCP.

This webinar will highlight IEA Bioenergy's strategic focus for the next five years as well as our planned key enabling research areas. It will give insights into the latest technologies available and into the policies that can support bioenergy as well as into the role of IEA Bioenergy for its development. We will also preview our modernized logo, website and visuals, which support our strategic goals. At the end of the webinar, attendees will have the chance to ask questions directly to IEA Bioenergy's chair.

The IEA Bioenergy Technology Collaboration Programme (TCP) is organised under the auspices of the International Energy Agency (IEA) but is functionally and legally autonomous. Views, findings and publications of the IEA Bioenergy TCP do not necessarily represent the views or policies of the IEA Secretariat or its individual member countries.
