

Invitation:

European Networking Group (ENG)

Harmonization & Standardization
Altonaer Straße 25, 99086 Erfurt |
27.-28.03.2023

For the first time the University of Applied Sciences Erfurt, with its experience in research and standardization in the field of Electric Road Systems, is hosting a physical event in the context of our AMELIE 2-project. We are looking forward to continue the international exchange on ERS in the well-established framework of the European Networking Group by bringing together our ideas and further developing harmonization & Standardization for ERS in Europe.

Within this ENG Workshop we want to initiate harmonization processes for Standards and Regulations with context to roadside equipment for ERS. We are aiming to find a consensus between the different existing ERS technologies and want to go new ways to unearth compatible solutions implementing ERS in Europe.

Topics

Standardization & Harmonization in:

- roadside equipment
- road markings
- road operation

Invitees

European experts for road infrastructure from research, industry, and policy.

Location

27th & 28th of March
University of Applied Sciences Erfurt,
Altonaer Straße 25, 99086 Erfurt, Germany.

Registration

E-Mail to Jonas Müller:
jonas.mueller.1@fh-erfurt.de

**We are very much looking forward to
meet you in Erfurt in March 2023!**
