

TEB Forum Brochure

Event

TEB Forum 2026
"Energy Transition in CEE"

Date and place

Vienna, 2&3 June, 2026

#TEB2026

TEB Forums, a *new* concept for the **energy sector**, bringing together Academia, Industry, Policymakers, Start Ups-Innovators and Finance to accelerate renewable deployment.

Connecting Expertise

Accelerating Energy Transition

www.theenergybridge.eu

About Us

We are The Energy Bridge (TEB), a strategic bridge initiative spin-off from the Technical University of Vienna (TU Wien), with 2 Co-founders, Rahul from India and Daniel from Chile, to enhance cooperation between Academia, Industry, Policymakers, Innovators, and Finance to accelerate the Energy Transition in the Central and Eastern Europe through Energy Forums, Research Projects, and Dissemination in English from Vienna for the region.

Supported by

Meet Our Team

Rahul Mishra

Co-Founder

- Electronics and Communication Engineer
- MSc International Business, HSE
- MSc Renewable Energies, TU Wien
- ScaleUpNation, Business Consultant, supporting high-growth **impact startups**
- Managing energy **media platform and conferences** at Enlit

Daniel Schaub

Co-Founder

- Civil Electrical Engineer
- MSc Renewable Energies, TU Wien
- **7 years Sustainable Professional at Ministry of Energy of Chile**
- 3 years Co-founder company in Chile, developing Renewable Energy
- Developed over **200 MW** of PV Projects

ABOUT the Forum

TEB Energy Forum 2026 is the essential 2-day annual convening in Vienna for CEE Energy Transition that connects the five pillars of the energy ecosystem—Policymakers, Finance, Industry, and Innovators, together with academia—to unlock strategic capital and accelerate scalable deployment across the region. The Forum moves beyond targets to tangible projects, featuring dedicated tracks on Grid Modernisation, Energy Storage, Strategic Financing of Critical Infrastructure, Industrial Decarbonization (Hydrogen & CCUS), Resilient Urban Energy (Heat and Efficiency) and EU & National Funded Projects.

Our Schedule:

Attendees: 400 people

**Day
01**

Tuesday, 2nd June 2026

Dive in the electrification of CEE region, focusing on Decarbonization and Digitalization. Enabling more investment in the region, including session with Ministers of Energy.

**Day
02**

Wednesday, 3rd June 2026

Discussing about Heat and Cooling in CEE region, successful cases such as distric heating, including a session with representatives of different CEE city capitals, and a Start-Ups in Energy pitch section.

EVENT CITY

Vienna

hosts most important regional energy bodies and research centres – a perfect neutral hub to gather CEE stakeholders, as the Energy Community Secretariat is based in Vienna; strong research capacity in TU Wien and AIT; major utilities and energy companies; WienEnergie, VERBUND and OMV are active here, and it is a policy Hub, with UN facilities.

Gateway to CEE Energy Transition

The Austrian capital is the natural gateway and connection between Eastern and Western Europe. From here, is the perfect place to cover and showcase what is happening in the Central and Eastern Europe Region (CEE).

With the development knowledge and resources of a Western European country, Austria also has a historical connection with the CEE region, acting as a role model, especially in Energy Regulations and implementation.

EVENT VENUE

weXelerate

**Austria's physical space
for innovation**

weXelerate offices – it is the Austria's largest and most impactful innovation ecosystem.

It counts with more than 9.000 m² space for innovation, and it is home of 40+ companies and start-ups.

To host the event here offers the space for meetings and events as well as many restaurants and cafés around the hub to make this the ideal space for the attendees.

Very centrally located, only 150 m from the first district and easily accessible by public transport, the building offers 35 offices and 5 event spaces including a large event area, that can be rented for your individual events.

Past Events

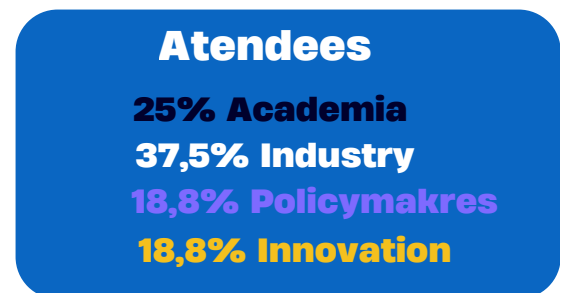

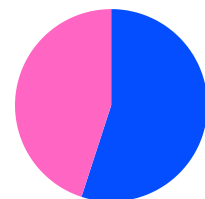

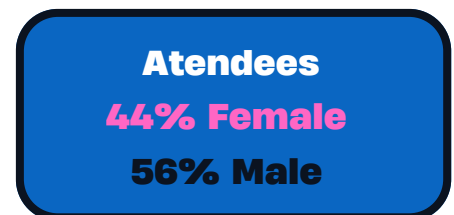

1st TEB Forum: "AI, Energy Security and Market Integration in CEE region"

This dialogue delved into the critical intersections of AI, energy security, and market integration, facilitating essential conversations among industry leaders and stakeholders

Date: May 28th, 2025

Place: ClimateLab

Participants: 97

Main Speakers

Leonore Gewessler

Member of Parliament
Austria
(Ex Austrian Minister of
Energy)

Nicola Kofler

Head-Asset Development
Wien Energie

Gerhard Mutter

Founder, Member of
Scientific Committee
EU PVSEC

Bharath Varsh Rao

Scientist
Austrian Institute of
Technology
(AIT)

Jasmina Trhulj

Head of Electricity Unit
Energy Community Secretariat

Korbinian Kasinger

Managing Director
kW-solutions

Past Events

2nd TEB Forum "State of the 4D's of Energy Transition in CEE"

Showcase of Collaboration between Industry, Innovators, Policymakers and Academia/Research in Energy in CEE, deeply exploring the 4D's of Energy Transition – **D**ecarbonization, **D**ecentralization, **D**igitalization, and **D**emocratization

Date: Sept 25th, 2025

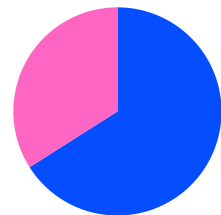

Place: TU Wien

Participants: 127

Attendees

34% Female

66% Male

Attendees

33% Academia

27,8% Industry

22,2% Policymakers

16,7% Innovation

Main Speakers

Benedikt Ennser

Directorate-General,
Federal Ministry of Energy,
Economy, and Tourism, Austria

Karol Galek

Member of Parliament,
Slovakia

Angela Berger

Coordination Integrated Regional
Energy Systems - CETP,
European and International
Programs, FFG

Anita Malli

Head of Environment
and Sustainability
ÖRF

Aleš Prešern

Vice President at Siemens Energy,
Head of South East Europe

Kitti Kropko

Head of Regulatory Affairs
MAVIR
(TSO Hungary)

Who we work with

 Federal Ministry Innovation, Mobility and Infrastructure Republic of Austria

 Bundesministerium Wirtschaft, Energie und Tourismus

 Parlament Österreich

THE ENERGY BRIDGE

Wie zwei TU-Studenten die Energiewende in Europa von Wien aus beschleunigen wollen

Von Wien aus wollen zwei Studenten die Energiewende in Europa neu denken. Mit The Energy Bridge, einem Projekt mit der Technischen Universität (TU) Wien, schaffen sie eine Plattform, die Politik, Industrie, Forschung und Innovation vernetzen soll.
