# 7th Leading Sustainable Shipping Technologies Forum

*Accelerating the Pathway to Sustainable Shipping!*

**Be part of the shipping community accelerating the pathway to sustainable shipping. Connect, collaborate, and help shape an emission-free future!**

The **Hamburg Port Authority (HPA)**, together with the **Large Engines Competence Center (LEC)**, invites you to the **7th Leading Sustainable Shipping Technologies Forum**, taking place as an exclusive live event at the **International Maritime Museum** in the historic **Speicherstadt** district of Hamburg.

The Forum is designed to foster the exchange of ideas, unlock synergies, promote cooperation, and connect key stakeholders across the maritime sector on the journey toward a zero-emission future.

## PROGRAM

- Keynote and panel discussions with leading green shipping minds
- Technical sessions on advanced fuels, autonomous port solutions, and next-generation emission monitoring
- Impressive historic venue offering an exclusive journey through maritime heritage

## TOPICS

- Autonomous Solutions for Sustainable Ports and Last-Mile Logistics
- Advanced Fuels and Scalable Retrofit Solutions
- Next-Generation Emission Monitoring and Control

Join us for an exciting day of inspiring discussions with internationally recognized experts in green shipping. The program will focus on the key drivers of shipping decarbonization and the **IMO 2050 emissions targets**.

To strengthen the collective efforts of all stakeholders in tackling current and future sustainability challenges, the Forum is organized as an annual event series, alternating between **Hamburg** and **Graz**.
