

ERA-NET Bioenergy / BESTF3 Implementation of additional activities

Doris Pollak

BESTF3?

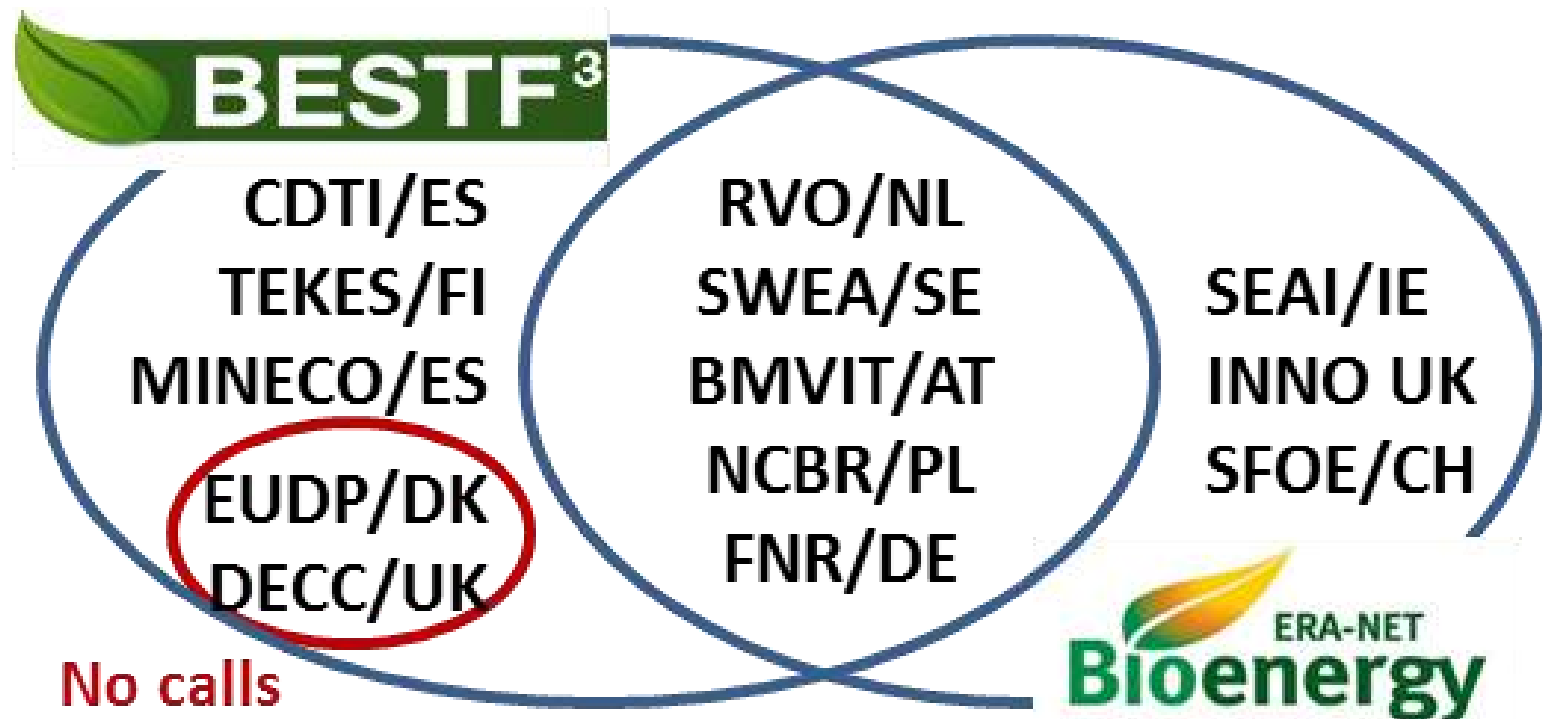

ERA-NET Bioenergy?

- BESTF3 supports projects in the higher TRLs (6-8): between proof of concept and generation income (valley of death)
- ERA-NET Bioenergy supports projects in the lower TRLs (3-5): RTD and development phase

- Reports

ERA-NET Bioenergy

Goal: The purpose of the ERA-NET is to provide additional value compared to national funding by supporting **transnational research and knowledge exchange**, and to thus increase the use of biomass for energy.

TRL 2 -5

Aim: It is therefore not only important to maintain and increase the amount of renewable resources that can be harvested on a sustainable basis, but also to use the available biomass as efficiently as possible.

BESTF3

Bioenergy Sustaining the Future (BESTF) is a European initiative aiming to encourage the **commercialisation** of bioenergy projects and increase renewable energy production across the EU. TRL 6-8

This ERANET cofund activity will provide funding and support to collaborative bioenergy projects at a pre-commercial stage that **demonstrate** one or more innovative steps.
