Clean Energy Education & Empowerment (C3E TCP)

The ideas and talents of all members of society are essential to building a sustainable future. Closing the gender gap and increasing women's participation and leadership in the field of energy is a prerequisite to meeting our shared clean energy challenges. The Clean Energy Education & Empowerment (C3E) Technology Collaboration Programme (TCP) has been working towards this goal in the framework of the International Energy Agency and the Clean Energy Ministerial. The Workshop's goal is to present the C3E TCP and other international initiatives as well as Austrian good practices, which aim to promote gender equality in companies in the field of clean energy. At the end, participants will have learnt from good practices, networked with role models active in the field and understood why the inclusion of women is vital for progress towards clean energy goals.

INFORMATION:

Beatrix Hausner
 ÖGUT – Austrian Society for Environment and Technology
 Email: beatrix.hausner@oegut.at

REGISTRATION:

Participation is free, please register until April 8th, 2019.
 The number of participants is limited, please register soon.
 We kindly ask you to please register at:
