Climate Action | Green Feed | Biorefinery

Michael Mandl, Bernhard Wich
tbw research GesmbH

A. Steinwider, M. Winter, G. Terler, R. Resch, M. Kropsch
HBLFA Raumberg- Gumpenstein

WHAT YOU CAN EXPECT...

- ▶ **Project Team**
- ▶ **Project scope and objectives**
- ▶ **Biochar and Green Biorefinery technology**
- ▶ **Biorefinery products characteristics**
- ▶ **Feeding tests and preliminary results**
- ▶ **Outlook**

FARM4MORE CONSORTIUM

In total 6 partners from
Ireland and Austria

Fundings from

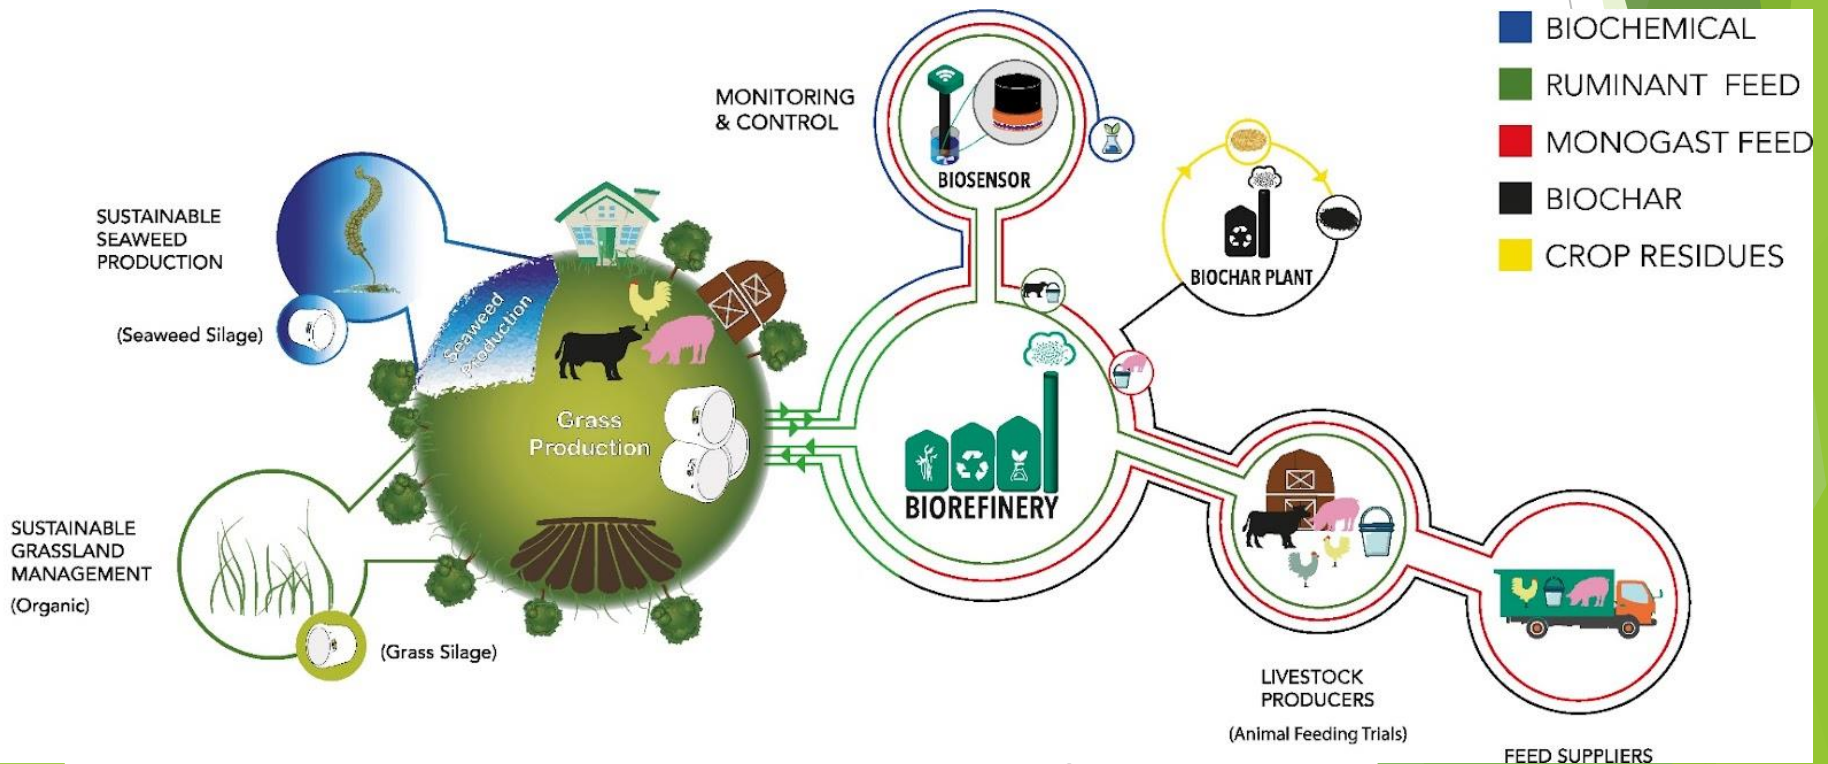

An Roinn Comhshaoil,
Aeráide agus Cumarsáide
Department of the Environment,
Climate and Communications

PROJECT SCOPE

- ▶ Demonstration of a **Green Biorefinery** process for organic feeds: ruminates (cattle) & monogastric (chicken, pigs..)
- ▶ Demonstration of a **small scale Biochar** process to deliver high quality biochar suitable as feed additive
- ▶ **Impact Assessment** of value chain (LCA, technical & economical & environmental assessment)
- ▶ **Prepare implementation** - define scenarios - stakeholder interaction

PROJECT OBJECTIVES

- ▶ **Key objective**
Delivering on climate mitigation impacts in farming by demonstration new feed strategies
 - ▶ **implementing products from green biorefining and biochar**
 - ▶ grass press cake as dairy feed
 - ▶ protein/ polypeptides/ amino acids concentrates for chicken and pigs feed products
 - ▶ biochar as feed additive
 - ▶ **Perform feed test** with “new feeds” to evaluate performance
 - ▶ **To deliver on reduced emissions** (GHG, ammonia and phosphor) in farming/dairy farming/animal production
 - ▶ **Provide strategies and scenarios for implementation**
 - ▶ **Dissemination and stakeholder involvement**

SMALL SCALE BIOCHAR PROTOTYPE

- ▶ Biochar prototype has app.100 KW_{thm} output
- ▶ Feedstocks: wood chips/pellets and husks
- ▶ Biochar quality is highly dependent on process parameters
- ▶ Mobile prototype
- ▶ Status of Implementation
 - Prototype in commissioning phase
 - EBC - European Biochar Certificate audit in progress
- ▶ Commercialisation Strategy
 - Numbering up by offering low-cost implementation

SMALL SCALE BIOCHAR PROTOTYPE

biochar **N**ergy

GREEN BIOREFINERY

- ▶ **Demonstration of a green biorefinery for organic certified feed products**
 - ▶ **Raw materials:** grass/clover/legumes mixtures
 - ▶ **Process steps**
 - ▶ High quality silage making
 - ▶ Extraction process/ pressing: → juice & pulp (solids)
 - ▶ Juice processing to accomplish feed properties, evaporation to concentrate (60-65%dm) for monogastric feed applications
 - ▶ Grass pulp conservation (ensiling, drying)
 - ▶ Alternative use of pulp for biogas process
 - ▶ **Products**
 - ▶ Hydrolysed protein (PPs/AAs) concentrates as alternative Protein
 - ▶ Grass press cake for feed (direct use/silage/ dried & pelletised)

GREEN BIOREFINERY IMPLEMENTATION

- ▶ Implementation of green biorefinery is executed in 2 phases

1st phase: small scale mobile pilot
(1000kg/h) to generate prototype products for feed tests

2nd phase: full scale green biorefinery
to process 10.000 t/a organic feedstocks located in Japans

GREEN BIOREFINERY PROTOTYPING

- ▶ July 2021 - GBR campaigning at HBLFA Raumberg - Gumpenstein

GREEN BIOREFINING CAMPAIGN AT HBLFA -RAUMBERG - GUMPENSTEIN

EVAPORATION TRAILS AT DIFFERENT SCALES

- ▶ Industrial scale: 3-effect fall film evaporator
- ▶ Pilot scale- on site evaporation

PROTOTYPE - NEW CHICKEN FEEDS

- ▶ Mixing 14 % AA-concentrate into 3 tons of pre-mixed feed, homogeneously!

- ▶ Final feed pellet including AA concentrates

OVERVIEW FEEDING TESTS

- ▶ **Biochar as feed additive** for ruminates and chicken to evaluate
 - reduction of methane emission in cattle breeding,
 - reduction of ammonia emission in chicken fattening.
- ▶ Characterisation/ feed value of press cake and CP/AA concentrates
- ▶ Storability / Re-ensiling of press cake
- ▶ **Grass silage press cake** as ruminates feed (dairy cows, organic)
- ▶ **CP/AA concentrates** integrated in chicken feed
- ▶ Feeding test nearly finished, but data not yet complete analyzed

RE-ENSILING

Re-ensiling of silage press-cakes after extraction
small scale (60L) and round bales scale (app 800-1000kg)

RE-ENSILING

Re-ensiling of silage press-cake works well without additives needed if done properly and within 1 day

| parameter | abbrev. | unit | silage absolut (benchmark) | | | re-ensiled presscake absolut | | | re-ensiled presscake relative difference to benchmark [%] | | |

PRELIMINARY RESULTS FROM FEEDING TESTS

- ▶ Biochar as feed additive for ruminates/chickens
 - **NO reduction** of methane emission in cattle breeding;
 - **NO reduction** of ammonia emission in chicken fattening.
- ▶ Grass silage press cake for dairy cows (organic)
- ▶ **No significant reduction in milk yield investigated** when 50% of forage was replaced by press cake; press cake suitable fodder for cattle; long run trials needed.
- ▶ CP/AA concentrates integrated in chicken feed ongoing - final results pending;
 - 10% inclusion rate for concentrate in feed mixture
 - daily weight gains similar to reference group.

FULL-SCALE GREEN BIOREFINERY IMPLEMENTATION

- ▶ Implementation of full scale green biorefinery is progressing (Gewerberechtliche Genehmigung)
- ▶ Cooperation with *BioEnergie aus Japons*
- ▶ Supply chain 10.000 t/a organic silage
- ▶ Green biorefinery will be integrated at existing biogas plant Japons to share feedstock supply, utilities and surplus heat

ACKNOWLEDGEMENTS

Thank you!
