### BRIEFING EU Legislation in Progress

## Revision of the Construction Products Regulation

### OVERVIEW

The Construction Products Regulation (Regulation (EU) No 305/2011, CPR) has applied fully since 1 July 2013. Its objective is to achieve the proper functioning of the internal market for construction products (such as waterproofing sheets, thermal insulation foams, chimneys and wood-based panels for permanent incorporation in construction works), by means of harmonised rules for their marketing in the EU. The CPR, which provides a common technical language to assess the performance of construction products, enables Member States to define the legal requirements for construction works.

On 30 March 2022, the Commission put forward a proposal to revise the CPR. The proposal is part of a package with several other sectoral proposals aimed at making sustainable products the norm in the EU and boosting circular business models. The stated aims of the proposal are to improve the functioning of the internal market for construction products, address the implementation

PRESS RELEASE | 18 December 2023 | Brussels

### New European Bauhaus Academy to build skills for sustainable construction with innovative materials

*"I welcome the New European Bauhaus Academy Alliance, a powerhouse of 14 European partners, ready to launch its EU-wide training network. It will be a solid support for Europe's construction industry, addressing labour shortages and promoting knowledge sharing including on sustainable bio-based solutions, like the circular use of wood and other innovative materials."*

**Ursula von der Leyen, President of the European Commission**

*"The New European Bauhaus is about bringing the European Green Deal to our living spaces. To make it a success, we need to equip our construction sector with the skills and knowledge it needs to tap into the potential of sustainable solutions. This is where the NEB Academy will make a difference."*

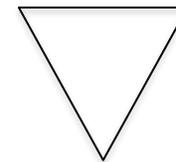

**Iliana Ivanova, Commissioner for Innovation, Research, Culture, Education and Youth**

*"I welcome the New European Bauhaus Academy Alliance which, through its diverse expertise across the EU, will address skill gaps in the sustainable and circular construction sector and create better employment opportunities at the regional and national level, while promoting high-quality and inclusiveness in construction."*

**Elisa Ferreira, Commissioner for Cohesion and Reforms**

## Skills!

Do we have enough skills or is there a need to master different sets of abilities?

## Main Objective

The main objective is to **establish an international network**, the **New European Bauhaus Academy Alliance (NEBA Alliance)**, which will **ensure high quality training is available and delivered** to as many workers as possible across Europe and the surrounding regions.

\_ **up-skilling** and **re-skilling** in the construction ecosystem

\_ focus on **SMEs** and **mid-caps-companies** that account for most jobs in the sector

Bauhaus Academy

## Skills

These skills are the key to unlock the potential of the construction ecosystem in decarbonising and transforming the built environment:

- \_ **biobased** materials and solutions
- \_ **sustainability** and **circularity** of materials and business models
- \_ **digitalisation**

## Vision of NEBA Alliance

**2 years:** Self-sustainable & recognized pan-European training ecosystem of NEBA HUBs and pilot training activities.

**5 years:** NEB Academy offering microcredentials and other training activities that are transferable

**10 years:** NEB Academy accepted globally & shaping the policies by offering high quality trainings
